OBJECTIVE

Seeking a software engineering internship opportunity for summer (May - August), 2017.

EDUCATION

The Ohio State University, Columbus, Ohio, USA Expected Graduation May, 2018

- MS in Computer Science and Engineering **Overall GPA(4.00 scale): 3.19**
- Courses: Machine Learning, Data Mining, Data Visualization, Algorithms, Advanced Operating Systems and Capstone Design - Information System.

SSN College of Engineering (SSNCE) [Anna University], Chennai, India Aug, 2012 - May, 2016

- Bachelor of Engineering in Computer Science and Engineering **Overall GPA(10.00 scale): 8.61(Top 10%)**

COMPUTER SCIENCE PROJECTS

Capstone Design - Information System Aug - Dec, 2016

- Revamped DigiClip.Inc's website to be a responsive Single Page App using **HTML5, Foundation Grid, AngularJS**.
- Built a TV search engine powered by **ExpressJS, MySQL** backend with Facebook and Google+ user authentication.

Language identification and extraction of text from bilingual forms: (Undergraduate thesis) Aug, 2015 - Apr, 2016

- Converted input image containing text to machine encoded text in regional Indian languages like Hindi, Tamil Malayalam, using **pytesseract** and performed probabilistic analysis on them to find text with minimum errors.
- Converted Tamil Nadu Government's digital forms containing text in Tamil, English and Tamil, Hindi to editable text
- Identified Tamil for 86% of input images, Hindi for 81% of images and Malayalam for 47% of test images.

Speech based integrated development environment: (Funded by SSN Research Foundation**)** Jan - Aug, 2015

- Created speech corpus from scratch for dictionary of 120 keywords pertaining to C, C++ and Java, using **Wavesurfer**.
- Generated Hidden Markov Model for each word in the dictionary using **HTK toolkit**. Trained the models with sample speech data using **shell programming** and **C**.
- Developed an IDE to which one can dictate code, give speech commands to compile, execute, save programs.

Restaurant Simulation: (CSE 6431 course project**)** Nov, 2016

- Simulated a restaurant using **Java** multithreading and synchronized the working of cooks, diners and machines using semaphores, locks and mutex.
- Employed various deadlock detection and prevention techniques for efficient resource utilization.

ACADEMIC WORK EXPERIENCE

Graduate Teaching Assistant (The Ohio State University) Jan-May, 2017

- Instructor of '**CSE 1222** : ***Introduction to Computer Programming in C++'*** for a section of 40 undergraduate students.
- Administer practical lab sessions; evaluate homework, lab submissions and provide feedback to students.

PROGRAMMING SKILLS

C, C++**,** Java, MySQL, Python, HTML5, JavaScript, Git, Linux, shell programming, Foundation, AngularJS, NodeJS and ExpressJS

SELF LEARNING

- Completed the 'Design and Analysis Of Algorithms' online course administered by Microsoft Research, Bangalore in August 2014.

LEADERSHIP EXPERIENCES

- Part of 'Teach A School' - entrepreneurship development cell, SSNCE Sep, 2013

  Taught mathematics and computer science to thirty 8th std. students of Thiruporur Government High School, India.
